Test Cases for the SauceDemo ecommerce website:

Total Number of Test Cases: 90

Home Page:

TC #1

Test Scenario ID: TS_HP_001

Test Scenario Description: Verify that the homepage loads successfully in different browsers

Test Case ID: TC_HP_001

Test Case Description: Verify that the homepage loads successfully in all the web browsers like Google chrome, Mozilla Firefox, Opera, Safari, Microsoft edge

Precondition:

User should have web browsers like Google chrome, Mozilla Firefox, Opera, Safari, Microsoft edge installed in the system

Test data:

> URL of the website

Steps to reproduce:

1. Open any required web browser Google chrome, Mozilla Firefox, Opera, Safari, Microsoft edge
2. Enter URL of the website

Expected Result:

Home Page of the website should be displayed successfully in any of the web browser used

Login Functionality in mobile devices both android and IOS:

TC #2

Test Scenario ID: TS_LM_001

Test Scenario Description: Verify successful login with valid user credentials

Test Case ID: TC_LM_001

Test Case Description: Swag Labs login functionality with valid user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

Expected Result:

User should be able to click on login button and navigate to the Inventory page while using mobile devices both Android and IOS

TC #3

Test Scenario ID: TS_HP_002

Test Scenario Description: Verify all the details displayed in the Home Page

Test Case ID: TC_HPD_001

Test Case Description: To verify all the text fields, button displayed on Home Page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to the Swag Labs URL

Steps to reproduce:

1. Open any required web browser Google chrome, Mozilla Firefox, Opera, Safari, Microsoft edge
2. Enter URL of the website

Expected Result:

System should display Home page with below details:

1. Swag Labs as the title, Username and Password fields along with Login button

2. Accepted usernames are:

   standard_user
   locked_out_user
   problem_user
   performance_glitch_user
   error_user
   visual_user

3. Password for all users:
   secret_sauce

TC #4

Test Scenario ID: TS_HP_002

Test Scenario Description: Verify field validation of text boxes in the Home Page

Test Case ID: TC_HPD_001

Test Case Description: To verify minimum length, maximum length and type of Username and Password text boxes displayed on Home Page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to the Swag Labs URL

Steps to reproduce:

1. Enter alphanumeric and special characters in Username field with minimum length
2. Clear Username field and enter alphanumeric and special characters in Username field with maximum length
3. Enter alphanumeric and special characters in Password field with minimum length
4. Clear Password field and enter alphanumeric and special characters in Password field with maximum length

Expected Result:

1. System should allow to enter alphanumeric and special characters in Username field with minimum as well as maximum length
2. System should allow to enter alphanumeric and special characters in Password field with minimum as well as maximum length

Login Functionality:

TC #5

Test Scenario ID: TS_LV_001

Test Scenario Description: Verify successful login with valid user credentials

Test Case ID: TC_LV_001

Test Case Description: Swag Labs login functionality with valid user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

Expected Result:

User should be able to click on login button and navigate to the Inventory page

TC #6

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_001

Test Case Description: Swag Labs login functionality with invalid user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: invalid username
2. Password: invalid password

Steps to reproduce:

1. Enter invalid Username

2. Enter invalid Password

3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Username and password do not match any user in this service

TC #7

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_002

Test Case Description: Verify whether user is able to click on close symbol of an error message displayed

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: invalid username
2. Password: invalid password

Steps to reproduce:

1. Enter invalid Username

2. Enter invalid Password

3. Click on Login button

4. Click on Close symbol of an error message displayed

Expected Result:

System should close an error message displayed

TC #8

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_003

Test Case Description: Verify whether Username field is mandatory

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: no username
2. Password: valid password

Steps to reproduce:

1. Do not enter any value in Username

2. Enter valid Password

3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Username is required

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

TC #9

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_004

Test Case Description: Verify whether password field is mandatory

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

        1. Username: valid username
        2. Password: no password

Steps to reproduce:

    1. Enter valid Username

    2. Do not enter any value in Password

    3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Password is required

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

TC #10

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_005

Test Case Description: Verify whether both username and password fields are mandatory

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

1. Username: no username
2. Password: no password

Steps to reproduce:

1. Do not enter any value in Username

2. Do not enter any value in Password

3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Username is required

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

TC #11

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_006

Test Case Description: Verify error message displayed while using invalid username and no password

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: invalid username
2. Password: no password

Steps to reproduce:

1. Enter invalid Username

2. Do not enter any value in Password

3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Password is required

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

TC #12

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_007

Test Case Description: Verify error message displayed while using no username and invalid password

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

        1. Username: invalid username
        2. Password: no password

Steps to reproduce:

    1. Do not enter any value in Username

    2. Enter invalid Password

    3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Username is required

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

TC #13

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_008

Test Case Description: Verify error message displayed while using valid username and invalid password

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

1. Username: valid username
2. Password: invalid password

Steps to reproduce:

1. Enter valid Username

2. Enter invalid Password

3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Username and password do not match any user in this service

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

TC #14

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_009

Test Case Description: Verify error message displayed while using invalid username and valid password

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: invalid username
2. Password: valid password

Steps to reproduce:

1. Enter invalid Username

2. Enter valid Password

3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Username and password do not match any user in this service

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

TC #15

Test Scenario ID: TS_LI_001

Test Scenario Description: Verify error message displayed with invalid user credentials

Test Case ID: TC_LI_010

Test Case Description: Verify case sensitivity in username and password

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

       1. Username: StanDArd_useR
       2. Password: SecreT_saUce

Steps to reproduce:

    1. Enter Username

    2. Enter Password

    3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Username and password do not match any user in this service

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

Testing Login functionality with different user types:

TC #16

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_001

Test Case Description: Verify error message displayed with locked out user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: locked_out_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

Expected Result:

System should display an error message as below with close symbol (Red colour background and white font colour):

Epic sadface: Sorry, this user has been locked out.

Post condition:

User should be able to click on close symbol so that system closes the displayed error message

TC #17

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_002

Test Case Description: Verify image of the product displayed in Inventory page with problem_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: problem_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

Expected Result:

System should not display required product images in the Inventory page

TC #18

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_003

Test Case Description: Verify sort functionality displayed in Inventory page with problem_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: problem_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Click on Filter/Sort dropdown

5. Select required value from the dropdown

Expected Result:

System should not allow user to sort the products listed in the Inventory page

TC #19

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_004

Test Case Description: Verify image of the product displayed in Inventory page with problem_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: problem_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

Expected Result:

System should not display required product images in the Inventory page

TC #20

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_005

Test Case Description: Verify functionality of the website with performance_glitch_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: performance_glitch_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

Expected Result:

System should take more time to load Inventory page

TC #21

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_006

Test Case Description: Verify functionality of the website with performance_glitch_user credentials in Your Cart page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: performance_glitch_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add any one product to cart by clicking on Add to cart button

5. Click on Cart icon

6. Click on Continue Shopping button

Expected Result:

System should take more time to go back to Inventory page

TC #22

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_007

Test Case Description: Verify functionality of the website with performance_glitch_user credentials in Checkout: Overview page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: performance_glitch_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add any one product to cart by clicking on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter all the details in Checkout: Your Information page

8. Click on Continue button

9. Click on Cancel button in Checkout: Overview page

Expected Result:

System should take more time to go back to Inventory page

TC #23

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_008

Test Case Description: Verify functionality of the website with performance_glitch_user credentials in Checkout: Complete! page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: performance_glitch_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add any one product to cart by clicking on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter all the details in Checkout: Your Information page

8. Click on Continue button

9. Click on Finish button in Checkout: Overview page

10. Click on Back Home button in Checkout: Complete! page

Expected Result:

System should take more time to go back to Inventory page

TC #24

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_009

Test Case Description: Verify functionality of clicking "All Items" in the website with performance_glitch_user credentials in Your Cart page

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

        1.   Username: performance_glitch_user
        2.   Password: secret_sauce

Steps to reproduce:

    1.   Enter Username

    2.   Enter Password

    3.   Click on Login button

    4.   Add any one product to cart by clicking on Add to cart button

    5.   Click on Cart icon

    6.   Click on Hamburger icon displayed at the top left corner of the window

    7.   Click on All Items

Expected Result:

System should take more time to load Inventory page

TC #25

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_010

Test Case Description: Verify functionality of clicking "All Items" in the website with performance_glitch_user credentials in Checkout: Your Information page

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

1. Username: performance_glitch_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add any one product to cart by clicking on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Click on Hamburger icon displayed at the top left corner of the window

8. Click on All Items

Expected Result:

System should take more time to go back to Inventory page

TC #26

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_011

Test Case Description: Verify functionality of clicking "All Items" in the website with performance_glitch_user credentials in Checkout: Overview page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: performance_glitch_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add any one product to cart by clicking on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter all the details in Checkout: Your Information page

8. Click on Continue button

9. Click on Hamburger icon displayed at the top left corner of the window

10. Click on All Items

Expected Result:

System should take more time to load Inventory page

TC #27

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_012

Test Case Description: Verify functionality of clicking "All Items" in the website with performance_glitch_user credentials in Checkout: Complete! page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: performance_glitch_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add any one product to cart by clicking on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter all the details in Checkout: Your Information page

8. Click on Continue button

9. Click on Finish button in Checkout: Overview page

10. Click on Hamburger icon displayed at the top left corner in Checkout: Complete! page

11. Click on All Items

Expected Result:

System should take more time to load Inventory page

TC #28

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_013

Test Case Description: Verify functionality of the Add to Cart button in Inventory page with error_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: error_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add all the products to cart by clicking on Add to cart button

Expected Result:

System should allow user to add only 3 products to the cart

TC #29

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_014

Test Case Description: Verify functionality of the Remove button in Inventory page with error_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

3. Username: error_user
1. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add all the products to cart by clicking on Add to cart button

5. Click on Remove button

Expected Result:

System should not allow user to click on Remove button

TC #30

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_015

Test Case Description: Verify Filter/Sort functionality in Inventory page with error_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: error_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Click on Filter/Sort dropdown

Expected Result:

System should display popup with below error message with OK button:

www.saucedemo.com says

Sorting is broken! This error has been reported to Backtrace.

Post Condition:

System should allow user to click on OK button and close the pop up

TC #31

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_016

Test Case Description: Verify whether user is able to enter all the details in Checkout: Your Information with error_user credentials

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

        1. Username: error_user
        2. Password: secret_sauce

Steps to reproduce:

    1. Enter Username

    2. Enter Password

    3. Click on Login button

    4. Add all the products to cart by clicking on Add to cart button

    5. Click on Cart icon

    6. Click on Checkout button

    7. Enter all the details in Checkout: Your Information page

Expected Result:

System should not allow user to enter Last Name

TC #32

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_017

Test Case Description: Verify functionality of the Finish button in Checkout: Overview page with error_user credentials

Precondition:

    1. User has opened Swag Labs on the browser

    2. User has navigated to Swag Labs URL

Test data:

        1. Username: error_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add all the products to cart by clicking on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter all the details in Checkout: Your Information page

8. Click on Continue button

9. Click on Finish button in Checkout: Overview page

Expected Result:

System should not allow user to click Finish button in Checkout: Overview page

TC #33

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_018

Test Case Description: Verify position of the icons, buttons, links displayed in the Inventory page with visual_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: visual_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Verify position of the icons, buttons, links displayed in the Inventory page

Expected Result:

1. Cart icon should not be displayed in Top Right corner of the window
2. Add To cart button of the last product displayed should not be aligned
3. System should not display image of the first product
4. Some of the Product Name links should not be aligned to right

TC #34

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_019

Test Case Description: Verify position of the Checkout button displayed in the Your Cart page with visual_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: visual_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add all the products to cart by clicking on Add to cart button

5. Click on Cart icon

6. Verify position of the Checkout button

Expected Result:

System should display Checkout button on the top right corner of the window

TC #35

Test Scenario ID: TS_LU_001

Test Scenario Description: Verify Login functionality with different user types

Test Case ID: TC_LU_020

Test Case Description: Verify position of the Cart icon displayed in all the pages with visual_user credentials

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: visual_user
1. Password: secret_sauce

Steps to reproduce:

1. Enter Username

2. Enter Password

3. Click on Login button

4. Add all the products to cart by clicking on Add to cart button

5. Click on Cart icon

6. Verify position of cart icon in the Your Cart page

7. Click on Checkout button

8. Verify the position of cart icon in Checkout: Your Information page

9. Enter all the details in Checkout: Your Information page

10. Click on Continue button

11. Verify the position of cart icon in Checkout: Overview page

12. Click on Finish button in Checkout: Overview page

13. Verify the position of cart icon in Checkout: Complete! page

Expected Result:

Cart icon should not be displayed in Top Right corner of the window

Inventory Page:

TC #36

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_001

Test Case Description: Verify that the "Add to cart" button adds products to the shopping cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Verify logo and page title

5. Click on Add to cart button to select as many required products

Expected Result:

1. System should display logo as Swag Labs and page title as Products
2. System should display corresponding numbers of product selected in the cart icon

TC #37

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_002

Test Case Description: Verify that the "Remove" button removes products from the shopping cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button to select as many required products

5. Click on Remove button

Expected Result:

System should display only corresponding numbers of product selected in the cart icon

TC #38

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_003

Test Case Description: Verify that the user is able to click on the product image displayed

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on product image

Expected Result:

1. System should display product image in larger size along with product description, price and Add to cart button
2. System should display Back to products link

Post Condition:

System should allow user to click on Back to products link which navigates to Inventory page

TC #39

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_004

Test Case Description: Verify that the user is able to click on the product name link displayed

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on product name link

Expected Result:

1. System should display product image in larger size along with product description, price and Add to cart button
2. System should display Back to products link

Post Condition:

System should allow user to click on Back to products link which navigates to Inventory page

TC #40

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_005

Test Case Description: Verify sort functionality displayed in Inventory page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Filter/Sort dropdown

5. Select required value from the dropdown

Expected Result:

1. System should display "Name (A to Z)" as the default value of the Filter/Sort dropdown
2. Filter/Sort dropdown should have 4 values like "Name (A to Z)", "Name (Z to A)", Price (low to high) and Price (high to low)

3. When "Name (A to Z)" value is selected, system should sort products as per ascending alphabetical order
4. When "Name (Z to A)" value is selected, system should sort products as per descending alphabetical order
5. When "Price (low to high)" value is selected, system should sort products as per increasing price value
6. When "Price (high to low)" value is selected, system should sort products as per decreasing price value

TC #41

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_006

Test Case Description: Verify user able to click on Cart icon

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Cart icon

Expected Result:

System should allow user to click on Cart icon and navigates to Your Cart page

TC #42

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_006

Test Case Description: Verify user able to add multiple products or all the products in to the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL chec

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button of all the products displayed

Expected Result:

System should allow user to add all the items into the cart

TC #43

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_007

Test Case Description: Verify user able to remove multiple products or all the products from the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button of all the products displayed

5. Click on Remove button of all the products displayed

Expected Result:

System should allow user remove all the products from the cart

TC #44

Test Scenario ID: TS_IN_001

Test Scenario Description: Verify all the options available in the Inventory page

Test Case ID: TC_IN_006

Test Case Description: Verify user able to close Hamburger icon menu options

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Hamburger icon at the top left corner

5. Click on close symbol

Expected Result:

System should be able to close Hamburger icon menu options

Maximum Time spent in the cart:

TC #45

Test Scenario ID: TS_MT_001

Test Scenario Description: Verify maximum time spent in the cart is 8 hours

Test Case ID: TC_MT_001

Test Case Description: Ensure that maximum time spent in the cart is 8 hours

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button of all the products displayed

5. Logout from the website and again Login after 8 hours

Expected Result:

System should clear the cart items soon after it crosses maximum time spent limit which is 8 hours

TC #46

Test Scenario ID: TS_MT_001

Test Scenario Description: Verify minimum time spent in the cart

Test Case ID: TC_MT_002

Test Case Description: Ensure minimum time spent in the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button of all the products displayed

5. Logout from the website and again Login before 8 hours

Expected Result:

System should not clear the cart items before maximum time spent limit which is 8 hours

TC #47

Test Scenario ID: TS_MT_001

Test Scenario Description: Verify added cart items exactly on 8 hours since it is added

Test Case ID: TC_MT_003

Test Case Description: Ensure minimum time spent in the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button of all the products displayed

5. Logout from the website and again Login exactly on 8 hours since it is added

Expected Result:

System should not clear the cart items.

Inventory Item Page:

TC #48

Test Scenario ID: TS_II_001

Test Scenario Description: Verify all the options available in the Inventory Item page

Test Case ID: TC_II_001

Test Case Description: Verify that the user is able to click on Add to Cart button to add product in the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on product name link

5. Click on Add to cart button

Expected Result:

System should allow user to click on "Add to cart" button to add product into the cart

TC #49

Test Scenario ID: TS_II_001

Test Scenario Description: Verify all the options available in the Inventory Item page

Test Case ID: TC_II_002

Test Case Description: Verify that the user is able to click on "Add to cart" button to add product in the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on product image

5. Click on Add to cart button

Expected Result:

System should allow user to click on "Add to cart" button to add product into the cart

TC #50

Test Scenario ID: TS_II_001

Test Scenario Description: Verify all the options available in the Inventory Item page

Test Case ID: TC_II_003

Test Case Description: Verify that the user is able to click on Remove button to remove product in the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on product name link

5. Click on Add to cart button

6. Click on Remove Button

Expected Result:

System should allow user to click on "Remove" button to remove product from the cart

TC #51

Test Scenario ID: TS_II_001

Test Scenario Description: Verify all the options available in the Inventory Item page

Test Case ID: TC_II_004

Test Case Description: Verify that the user is able to click on Remove button to remove product in the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on product image link

5. Click on Add to cart button

6. Click on Remove Button

Expected Result:

System should allow user to click on "Remove" button to remove product from the cart

Your Cart Page:

TC #52

Test Scenario ID: TS_YC_001

Test Scenario Description: Verify all the options available in the Your Cart page

Test Case ID: TC_YC_001

Test Case Description: Verify that the user is able to click on Remove button to remove product in the cart

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Remove button

Expected Result:

1. System should display quantity and description, price, product name link of the product selected along with Remove button, Continue Shopping button and Checkout button
2. On clicking Remove button, system should remove the product selected

Post Condition:

In the Your Cart page, QTY should non editable field and Description should display Product Name as link. Clicking on this product name link, system should display Inventory Item page

TC #53

Test Scenario ID: TS_YC_001

Test Scenario Description: Verify all the options available in the Your Cart page

Test Case ID: TC_YC_002

Test Case Description: Verify that the user is able to click on Continue Shopping button

Precondition:

1. User has opened Swag Labs on the browser
2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username
2. Enter valid Password
3. Click on Login button
4. Click on Add to cart button
5. Click on Cart icon
6. Click on Continue Shopping button

Expected Result:

System should navigate back to Inventory Page

TC #54

Test Scenario ID: TS_YC_001

Test Scenario Description: Verify all the options available in the Your Cart page

Test Case ID: TC_YC_003

Test Case Description: Verify that the user is able to click on Checkout button

Precondition:

1. User has opened Swag Labs on the browser
2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

Expected Result:

System should display "Checkout: Your Information" page

"Checkout: Your Information" page:

TC #55

Test Scenario ID: TS_CY_001

Test Scenario Description: Verify all the options available in the Checkout: Your Information page

Test Case ID: TC_CY_001

Test Case Description: Verify that First Name, Last Name and Zip/Postal Code all 3 are mandatory fields

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Verify Page title

8. Do not enter any values in First Name, Last Name and Zip/Postal Code fields

9. Click on Continue button

Expected Result:

1. System should display page title as Checkout: Your Information

2. System should display below error message along with close symbol:

Error: First Name is required

Post condition:

System should be able to close error message upon clicking close symbol

TC #56

Test Scenario ID: TS_CY_001

Test Scenario Description: Verify all the options available in the Checkout: Your Information page

Test Case ID: TC_CY_002

Test Case Description: Verify that First Name is a mandatory field

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Do not enter any value in First Name

8. Enter Last Name

9. Enter Zip/Postal Code

10. Click on Continue button

Expected Result:

System should display below error message along with close symbol:

Error: First Name is required

Post condition:

System should be able to close error message upon clicking close symbol

TC #57

Test Scenario ID: TS_CY_001

Test Scenario Description: Verify all the options available in the Checkout: Your Information page

Test Case ID: TC_CY_003

Test Case Description: Verify that Last Name is a mandatory field

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter First Name

8. Do not enter any value in Last Name

9. Enter Zip/Postal Code

10. Click on Continue button

Expected Result:

System should display below error message along with close symbol:

Error: Last Name is required

Post condition:

System should be able to close error message upon clicking close symbol

TC #58

Test Scenario ID: TS_CY_001

Test Scenario Description: Verify all the options available in the Checkout: Your Information page

Test Case ID: TC_CY_003

Test Case Description: Verify that Zip/Postal Code is a mandatory field

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter First Name

8. Enter Last Name

9. Do not enter any value in Zip/Postal Code

10. Click on Continue button

Expected Result:

System should display below error message along with close symbol:

Error: Postal Code is required

Post condition:

System should be able to close error message upon clicking close symbol

TC #59

Test Scenario ID: TS_CY_001

Test Scenario Description: Verify all the options available in the Checkout: Your Information page

Test Case ID: TC_CY_004

Test Case Description: Verify Cancel button functionality

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Click on Cancel button

Expected Result:

System should navigate back to "Your Cart" page

TC #60

Test Scenario ID: TS_CY_001

Test Scenario Description: Verify all the options available in the Checkout: Your Information page

Test Case ID: TC_CY_005

Test Case Description: Verify Checkout button functionality

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter First Name, Last Name and Zip/Postal Code

8. Click on Continue button

Expected Result:

1. System should display "Checkout: Overview" page with below information such as QTY, Description, Payment Information, Shipping Information, Price Total which includes Item Total and Tax, Total
2. System should display Cancel button and Finish button

Checkout: Overview page:

TC #61

Test Scenario ID: TS_CO_001

Test Scenario Description: Verify all the options available in the "Checkout: Overview" page

Test Case ID: TC_CO_001

Test Case Description: Verify Cancel button functionality

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter First Name, Last Name and Zip/Postal Code

8. Click on Continue button

9. Verify Page Title and all the displayed details

10. Click on Cancel button

Expected Result:

1. Page title should be displayed Checkout: Overview
2. System should display "Checkout: Overview" page with below information such as QTY, Description, Payment Information, Shipping Information, Price Total which includes Item Total and Tax, Total
3. System should navigate back to Inventory Page

End to end major functionality:

TC #62

Test Scenario ID: TS_CO_001

Test Scenario Description: Verify all the options available in the "Checkout: Overview" page

Test Case ID: TC_CO_002

Test Case Description: Verify Finish button functionality

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter First Name, Last Name and Zip/Postal Code

8. Click on Continue button

9. Verify Page Title and all the displayed details

10. Click on Finish button

Expected Result:

1. System should navigate to Checkout: Complete! Page

2. System should display successful message which includes a green colour tick mark and says as below:

Thank you for your order!

Your order has been dispatched, and will arrive just as fast as the pony can get there!

3. "Back Home" button should be displayed
4. Cart icon should be cleared

Checkout: Complete! Page:

TC #63

Test Scenario ID: TS_CC_001

Test Scenario Description: Verify all the options available in the "Checkout: Complete" page

Test Case ID: TC_CC_002

Test Case Description: Verify Back Home button functionality

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Enter First Name, Last Name and Zip/Postal Code

8. Click on Continue button

9. Click on Finish button

10. Click on "Back Home" Button

Expected Result:

System should navigate back to Inventory page

Logout Functionality:

TC #64

Test Scenario ID: TS_LO_001

Test Scenario Description: Verify that system saves the added cart items even after user logs out successfully

Test Case ID: TC_LO_001

Test Case Description: Ensure that system saves the cart items even after successful log out from Inventory Page

Precondition:

1. User has opened Swag Labs on the browser
2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user
2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username
2. Enter valid Password
3. Click on Login button
4. Click on Add to cart button
5. Click on Add to cart button to add another product into the cart
6. Click on Hamburger icon
7. Click on Logout menu
8. Enter Username and Password
9. Click on Login button
10. Verify and click on Cart icon

Expected Result:

System should display previously added cart items along with QTY and Description

TC #65

Test Scenario ID: TS_LO_001

Test Scenario Description: Verify that system saves the added cart items even after user logs out successfully

Test Case ID: TC_LO_002

Test Case Description: Ensure that system saves the cart items even after successful log out from Inventory Item Page using Product Image

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Product Image

5. Click on Add to cart button

6. Click on Hamburger icon

7. Click on Logout menu

8. Enter Username and Password

9. Click on Login button

10. Verify and click on Cart icon

Expected Result:

System should display previously added cart item along with QTY and Description

TC #66

Test Scenario ID: TS_LO_001

Test Scenario Description: Verify that system saves the added cart items even after user logs out successfully

Test Case ID: TC_LO_003

Test Case Description: Ensure that system saves the cart items even after successful log out from Inventory Item Page using Product Description link

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Product Description link

5. Click on Add to cart button

6. Click on Hamburger icon

7. Click on Logout menu

8. Enter Username and Password

9. Click on Login button

10. Verify and click on Cart icon

Expected Result:

System should display previously added cart item along with QTY and Description

TC #67

Test Scenario ID: TS_LO_001

Test Scenario Description: Verify that system saves the added cart items even after user logs out successfully

Test Case ID: TC_LO_004

Test Case Description: Ensure that system saves the cart items even after successful log out from Your Cart Page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Hamburger icon

7. Click on Logout menu

8. Enter Username and Password

9. Click on Login button

10. Verify and click on Cart icon

Expected Result:

System should display previously added cart item along with QTY and Description

TC #68

Test Scenario ID: TS_LO_001

Test Scenario Description: Verify that system saves the added cart items even after user logs out successfully

Test Case ID: TC_LO_005

Test Case Description: Ensure that system saves the cart items even after successful log out from Checkout: Your Information Page

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. Click on Cart icon

6. Click on Checkout button

7. Click on Hamburger icon

8.   Click on Logout menu

9.   Enter Username and Password

10. Click on Login button

11. Verify and click on Cart icon

Expected Result:

System should display previously added cart item along with QTY and Description

TC #69

Test Scenario ID: TS_LO_001

Test Scenario Description: Verify that system saves the added cart items even after user logs out successfully

Test Case ID: TC_LO_006

Test Case Description: Ensure that system saves the cart items even after successful log out from Checkout: Overview Page

Precondition:

1.   User has opened Swag Labs on the browser

2.   User has navigated to Swag Labs URL

Test data:

1.   Username: standard_user

2.   Password: secret_sauce

Steps to reproduce:

1.   Enter valid Username

2.   Enter valid Password

3.   Click on Login button

4.   Click on Add to cart button

5.   Click on Cart icon

6.   Click on Checkout button

7.   Click on Continue button

8.   Click on Hamburger icon

9.   Click on Logout menu

10. Enter Username and Password

11. Click on Login button

12. Verify and click on Cart icon

Expected Result:

System should display previously added cart item along with QTY and Description

Session timeout:

TC #70

Test Scenario ID: TS_ST_001

Test Scenario Description: Verify that system displays session timeout message

Test Case ID: TC_ST_006

Test Case Description: Ensure that system displays session timeout message when the user is idle for long time

Precondition:

1. User has opened Swag Labs on the browser

2. User has navigated to Swag Labs URL

Test data:

1. Username: standard_user

2. Password: secret_sauce

Steps to reproduce:

1. Enter valid Username

2. Enter valid Password

3. Click on Login button

4. Click on Add to cart button

5. User should be idle for some time and Click on Cart icon

Expected Result:

User should be logged out and navigated back to home page with below error message:

Epic sadface: You can only access '/inventory.html' when you are logged in.

Post Condition:

User should be able to click on close symbol which is displayed in the error message

General Test Cases for all the pages:

Logout functionality with no products in the cart:

TC #71

Test Scenario ID: TS_LO_001

Test Scenario Description: Verify the successful Logout from all the pages

Test Case ID: TC_LO_001

Test Case Description: Ensure that system logs out successfully from Inventory Page

Precondition:
